1989

tradition since

ZARYS is a family-owned company with Polish capital, operating on the market since 1989

Evolution from a small enterprise to a leader in the sourcing industry is a process that led to the creation of more comprehensive offers and solutions that facilitate the work of medics and save the lives of patients. ZARYS is currently hiring over 400 people, who are working to serve thousands of clients operating in the field of health care worldwide.

we provide

medical disposable devices

to cover over

basic medical devices

gloves

dressings

medical clothing

surgical drapes and gowns

comprehensive medical supplies for hospitals

The company's customers have many product groups at their disposal, starting from medical gloves, through dressing materials, to operating kits and treatment packages. Products from different categories have individual characteristics and specific purposes. In order to facilitate the identification of materials and improve the ordering process, 13 different categories were created in addition to the latest category „ZARYS kids“.

900%

of the hospital's needs

surgical sets

personal protective equipment

patient hygiene

pharmaceutical line

sports & physiotherapy products

being a manufacturer of disposable medical equipment, ZARYS meets the highest required standards

Part of ZARYS production plants are located in Silesia and combine sterile production - a cleanroom with an area of over 600 m² - a place for manufacturing dedicated operating sets, a sewing room and an automated production line.

pro

Zarys logistic center

The ZARYS logistic center is the largest warehouse of disposable medical equipment in Central Europe. Located in Zabrze area as part of Katowice Special Economic Zone. Modern, high-bay warehouse, occupies an area of over 30 000 m².

BASIC MEDICAL DEVICES

pp. 32-87

BASIC INJECTION EQUIPMENT

- 35 **dispoFINE** injection needle
- 35 **dispoGUARD** safety injection needle
- 36 **dispoSULIN** insulin pen needle
- 36 **dicoSPIKE, dicoSPIKE Chemo** withdrawal cannula
- 38 **duoNEX** single-use syringe, 2-part, Luer
- 38 **dicoNEX SN** single-use syringe, 3-part, Luer, with needle alongside the syringe
- 39 **dicoNEX** single-use syringe, 3-part, Luer
- 39 **dicoNEX** single-use syringe, 3-part, Luer-Lock
- 40 **dicoNEX** single-use syringe, 3-part, Luer-Lock + amber
- 40 **dicoNEX** single-use catheter syringe, 3-part
- 41 **dicoTUBER** tuberculin syringe
- 41 **dicoSULIN** insulin syringe

INFUSION THERAPY

- 43 **SANViflon** I.V. cannula
- 43 **SANViflon S** I.V. cannula without port
- 44 **easyFLOW IS PREMIUM** infusion set **BESTSELLER**
- 44 **easyFLOW IS** infusion set
- 45 **easyFLOW IS** infusion set (dual chamber) **BESTSELLER**
- 45 **easyFLOW IS ECO** infusion set
- 46 **easyFLOW IS SAFE** infusion set
- 46 **easyFLOW IS AMBER** infusion set, amber
- 47 **easyFLOW IS REG** infusion set with precision flow rate regulator
- 47 **easyFLOW TS PREMIUM** transfusion set **BESTSELLER**
- 48 **easyFLOW TS** transfusion set
- 48 **easyFLOW LINE** extension tube for infusion pump
- 49 needle-free valve
- 49 needle free valve with extension line
- 50 3-way stopcock
- 50 3-way stopcock with extension tube
- 51 cannula stopper

OXYGEN THERAPY

- 53 nasal oxygen cannula
- 53 oxygen tubing
- 53 oxygen mask
- 54 non-rebreather mask
- 54 multi-vent mask
- 54 nebulizer mask
- 55 nebulizer

ANAESTHESIA PRODUCTS

- 57 endotracheal tube uncuffed
- 57 endotracheal tube cuffed
- 57 reinforced endotracheal tube cuffed
- 58 intubation stylet
- 58 tracheal tube introducer
- 58 endotracheal tube holder
- 59 oropharyngeal airway/guedel airway
- 59 laryngeal mask PVC
- 60 laryngeal mask silicone
- 60 tracheostomy tube cuffed
- 61 air cushion anaesthetic mask
- 61 anaesthetic mask with open seal
- 62 catheter mount with double swivel
- 62 elbow connector
- 62 dual-limb breathing circuit

SUCTION CATHETERS, STOMACH TUBES

- 64 suction catheter with vacuum control
- 64 suction catheter
- 65 suction catheter with frozen surface
- 65 feeding tube graduated, with X-ray contrast
- 67 stomach tube/duodenal tube

UROLOGICAL CATHETERS, URINE BAGS

- 68 Foley catheter 2-way, silicone-coated latex
- 69 Foley catheter 3-way, silicone-coated latex
- 69 Foley catheter 2-way with tiemann tip, silicone-coated latex
- 70 Foley catheter 2-way, 100% silicone
- 70 Foley catheter 3-way, 100% silicone
- 71 Nelaton catheter
- 71 Tiemann catheter
- 72 Pezzer catheter silicone-coated latex
- 72 urine bag with sample port 2W
- 73 urine bag
- 73 urine bag with sample port
- 74 urine bag with absirbet, non sterile
- 74 samples taking urine bag
- 74 urine bag hanger

GENERAL SURGERY

- 76 Yankauer surgical suction cannula, standard CH21
- 76 Yankauer surgical suction cannula, bulb tip CH23
- 77 surgical suction tube
- 77 surgical suction set with Yankauer cannula, standard
- 78 surgical suction set with Yankauer cannula, bulb tip

BASIC PRODUCTS FOR GYNECOLOGY

- 80 vaginal speculum, cusco type
- 80 cervical brush, standard
- 81 cervical brush, special
- 81 umbilical cord clamp

OTHER PRODUCTS

- 83 ID wristband
- 83 entrance mat
- 83 enema bag
- 84 enema bag
- 84 enema set
- 84 vomit bag
- 85 tactical tourniquet CAT
- 85 automatic tourniquet
- 86 latex-free tourniquet
- 86 tongue depressor
- 87 electronic thermometer
- 87 **safeLANCE**, pressure-activated safety lancet

DRESSINGS pp. 88-127

TRADITIONAL DRESSING MATERIALS

gauze and non-woven dressings

- 91 **GAZA lux** dressing gauze, zig-zag folded
- 91 **GAZA lux** cutting gauze
- 91 **GAZA lux S** cutting gauze
- 92 **KOMPRI lux** gauze swabs **BESTSELLER**
- 93 **KOMPRI lux S** gauze swabs
- 94 **SERVI lux** gauze lap sponges
- 94 **SERVI lux S** gauze lap sponges
- 95 **TUPFER lux** gauze balls
- 95 **TUPFER lux S** gauze balls
- 96 **NONVI lux** non-woven swabs
- 96 **NONVI lux S** non-woven swabs
- 96 **NONVI lux S** non-woven swabs, with Y-incision
- 97 **MULTIabsorb** ABD pads, multi-layer
- 97 **MULTIabsorb S** ABD pads, multi-layer
- 98 **elastoLUMENAL** eye pads
- 98 **elastoLUMENAL S** eye pads
- 98 **cellPAD** cellulose swabs **BESTSELLER**

ADHESIVE TAPES AND PLASTERS WITH DRESSING

adhesive tapes

- 100 **SENSiplast** adhesive fabric tape, white
- 100 **PLASTiplast** adhesive fabric tape, skin colour
- 101 **SOFTplast** adhesive non-woven tape
- 101 **SILKplast** adhesive silk tape
- 101 **SILLCoplast** adhesive perforated non-woven tape
- 102 **FILMplast** adhesive PE tape
- 102 **POREplast** adhesive perforated non-woven tape

plasters with dressing

- 103 **NONVIplast** non-woven plaster with dressing
- 103 **FABRIplast** fabric plaster with dressing

SPECIAL PURPOSE DRESSINGS

self-adhesive non-woven dressings

- 105 **elastopor, elastopor E** adhesive non-woven dressing tape
- 106 **elastopor STERIL** non-woven dressing with absorbent pad **BESTSELLER**
- 106 **elastoKIDS STERIL** non-woven dressing with absorbent pad
- 107 **elastopor IV** non-woven IV cannula dressing **BESTSELLER**
- 107 **elastoKIDS IV** non-woven IV cannula dressing
- 108 **elastopor STERIL D** non-woven dressing with absorbent pad, incision and O-hole
- 108 **elastoKIDS STERIL D** non-woven dressing with absorbent pad
- 109 **elastopor EYE, elastoKIDS EYE** non-woven eye dressing with absorbent pad
- 109 **elastoKIDS** colorful kids plasters

stabilizing tapes

- 110 | **elastoNASAL** non-woven nasal cannula fixation plaster
- 110 | **elastoNASAL KIDS** non-woven nasal cannula fixation plaster
- 111 | **elastoFIXAL** adhesive tape for catheter tubing fixation
- 111 | **elastoFIXAL KIDS** adhesive tape for catheter tubing fixation
- 111 | **elastoFIXAL Set** adhesive tape for endotracheal tube
- 112 | **elastoFIXAL Set KIDS** adhesive tape for endotracheal tube
- 112 | **elastoFIXAL TUBE** band for tracheostomy tube fixation
- 112 | **elastoDERM C** adhesive dressing pouch for dialysis catheters **NEW**

STABILIZING DRESSINGS

fixation of dressings

- 114 | **elastoBAND BASIC** knitted supporting bandage
- 114 | **elastoBAND KNITT** elastic supporting bandage, knitted **BESTSELLER**
- 115 | **elastoBAND FLEX** elastic supporting bandage, woven
- 115 | **elastoBAND FLEX S** elastic supporting bandage, woven **NEW**
- 115 | **elastoBAND FIX** elastic supporting bandage, woven **BESTSELLER**
- 116 | **elastoBAND CREPP** cohesive supporting bandage, non-woven **BESTSELLER**
- 116 | **yellowBAND** cohesive bandage
- 117 | **elastoNET** elastic tubular net bandage

immobilizing dressings

- 118 | **orthoNATURAL** orthopedic padding, natural
- 118 | **orthoSYNTHETIC** orthopedic padding, synthetic
- 119 | **elastoSLING** triangular sling
- 120 | **orthoBAND FAST** P.O.P. bandages
- 120 | **orthoBAND NORMAL** P.O.P. bandages
- 120 | **orthoBAND LONG** P.O.P. bandages

SPECIALIST DRESSINGS

- 123 | **paraffiNET** paraffin gauze dressing

foil dressings

- 123 | **elastoDERM** foil dressing
- 123 | **elastoDERM PAD** foil dressing with absorbent pad
- 124 | **elastoDERM F** foil dressing with frame
- 124 | **elastoDERM F-IV** IV cannula dressing with frame
- 124 | **elastoDERM IV** IV cannula dressing

ADDITIONAL PRODUCTS

- 126 | **thermPAD** cold/warm compress **BESTSELLER**
- 126 | **gynPAD** gynaecological-maternity pad **BESTSELLER**
- 126 | **Alcohol Prep Pad** gauze pad moistened with alcohol
- 127 | **ALKOPAD** gauze pad moistened with alcohol
- 127 | **ALKOPAD DUO** gauze pad moistened with alcohol
- 127 | **thermCARE** rescue blanket, foil, termic

VITAHEALTH

pp. 242-243

EXAMINATION GLOVES

The device is intended for patient diagnostics, providing a barrier to the transmission of microorganisms between the operator and the patient, minimizing the risk of cross-contamination.

NITRILE GLOVES are made of synthetic acrylonitrile butadiene rubber (NBR), they are an alternative to latex gloves. They do not contain latex proteins, and the content of chemical accelerators is minimized, so they are friendly to the skin.

They are characterized by:

- high **mechanical strength** (also for puncture),
- **chemical and biological resistance** (constitute a barrier for viruses and bacteria),
- **flexibility**, thanks to which they adjust to the hand, providing the work comfort to the user.

VINYL GLOVES made of PVC (polyvinyl chloride) are intended for low-risk procedures due to limited mechanical, chemical and biological resistance. The glove material does not cause Type I allergic reactions, ZARYS vinyl gloves are free of harmful phthalates.

LATEX GLOVES made of natural rubber are recognized as the best barrier against blood borne pathogens and part of hazardous chemical substances. They are also characterized by high flexibility, providing the work comfort to the user by fitting to the hand like a „second skin“. Latex gloves, due to the natural raw material, are biodegradable.

STERILE, SURGICAL AND PROTECTIVE GLOVES

Made from natural rubber latex, intended to be worn on hands in surgical settings to provide barrier against potentially infectious fluids or other contaminants, and to protect the patient by ensuring sterility of the wound area. These gloves are intended for single use only, and are classified as Medical Devices Class IIa as well as a Personal Protective Equipment Category III. The indicated Gloves are designed to protect against substances and mixtures which are hazardous and against harmful biological agents.

mediCARE nitrile Hydra+

Dermatology solution for skin problems

gloves that protect and nourish the hands, while providing long-lasting hydration

Almond oil

regenerates, moisturizes, slows the aging process of the skin, smoothen, firms and helps removing dead cells, brighten the skin, soothen irritations and accelerates healing skin lesions, strengthens the hydro-lipid layer of the skin

Vitamin E

natural antioxidant, vitamin of youth – fights off free radicals and prevents wrinkles, moisturizes for a long time

Glycerin

moisturizes, improves skin appearance, smoothen and soothes irritations

Anti-wrinkle effects proven in clinical test*

*mediCARE Hydra+ glove presents a better anti-wrinkle effect compared to a traditional nitrile glove with visible reduction of wrinkles from the first day of use with progressive increase in improvement until the end of the tests.

INDUSTRIAL GLOVES

Gripzzly gloves are made of high-quality nitrile and are characterized by extraordinary strength and thickness. This translates into their durability and increased resistance to all kinds of damage. Gripzzly gloves provide comfort, especially during prolonged and demanding tasks.

diamond texture

allows you to use your smartphone without taking off your gloves

reduces hand perspiration, providing excellent air circulation inside the glove

offers excellent protection and comfort in use

makes the glove fit the shape of the hand

provides a precise and secure grip

work safety

Gripzzly gloves are a guarantee of safety and comfort at work. They are not prone to tearing and abrasion, making them ideal for use in harsh and demanding conditions. They are characterized by resistance to a variety of oils, greases and other chemicals, ensuring safety at work.

Gripzzly are excellent protection for the hands of workers exposed to contact with sharp tools and other dangerous objects. They are recommended for those working in many industries, such as the chemical, pharmaceutical and automotive industries, exposed to chemicals.

Save space increase safety

reduction
of occupied
space

even up to
80%

● Ease of customisation

The dispenser's ability to open both vertically and horizontally makes it easily adaptable to almost any space.

● Saving space

The compact dispenser reduces space requirements by up to 80% compared to standard packaging.

● Easy access

The packaging ensures easy access to the gloves and their optimal storage.

● Sustainable development

Smaller packaging means less cardboard is used, which contributes to waste reduction and a lower environmental impact.

safeCARE

The safeCARE surgical glove packaging system is a breakthrough in space management and hygiene in medicine. The compact dispenser can accommodate up to 50 pairs of sterile gloves, reducing space requirements by up to 80 per cent compared with standard packaging of this type.

safeCARE surgical glove packaging not only ensures **easy access and optimum storage**, but also helps maintain a **high standard of hygiene and safety**, protecting against contamination and damage. They also offer consumption control, which allows for **efficient stock management**.

● Saving time and increasing work efficiency

An additional opening for returning unopened pairs of gloves saves time and increases staff efficiency without having to open the entire pack.

● Safety and hygiene

The packaging ensures a high standard of hygiene and safety, protecting against contamination and damage.

● Consumption control

Possibility of efficient stock management, thanks to the glove wear control function.

Precise protection, reliable durability

- with increased durability
- soft and flexible
- with enhanced tear resistance
- recommended for work with cytostatic drugs in aseptic conditions
- recommended for double gloving procedures

The use of an inner coating in gloves is an innovative solution that facilitates putting them on both dry and wet hands. Quantum Secure Technology reduces friction and improves user comfort. The QST coating ensures safety while harmoniously integrating with the glove's structure, guaranteeing optimal durability and flexibility, while also enhancing hygiene and protection standards.

construction of the syringe

**GET TO KNOW
OUR SYRINGES**

nozzle types:

Luer slip, centric

tip of the syringe is pushed into the hub of the needle or other device (e.g. catheters) and twisted. It allows to remove the connection immediately if necessary

Luer slip, eccentric

eccentric location of the tip is used in procedures involving the administration of drugs and fluids where closer proximity to skin is necessary

Luer-Lock

designed to secure connection between the syringe and the device (needle, tube, catheter, stopcock, etc.). The tip is equipped with thread to screw in the syringe to prevent disconnection

catheter tip 90°

type of connection used for rinsing (cleaning) catheters, stomach tubes and feeding purposes

catheter tip 45°

nozzle cut at 45 degrees increases the lumen surface

insulin and tuberculin syringes

special design of the plunger seal reduces the drug/liquid residues

- transparent barrel allows full visual control of content
- Luer nozzle
- smooth plunger sliding thanks to rubber sealing
- limitation flange securing against accidental removal of plunger
- clear, legible and permanent black graduation every 0,01 ml that allows precise dosing of medicine/liquid
- special design of plunger stopper reduces the residual volume of medicine/liquid
- name of syringe and manufacturer's logo placed on barrel
- single-use
- non-pyrogenic, non-toxic
- packaging: 1 pc./paper-foil (blister)

indication

- 3-piece syringe intended for precise drawing up and administering of medicines/liquids

REF	no. of units	capacity	intermediate packaging
TU-U20-1-BL	20	1 ml	100 pcs

bulk packaging:
32 x 100 pcs

dicoSULIN

insulin syringe

features

- with bypacked needle 0,4 x 13 mm
- transparent barrel made of polypropylene allows full visual control of content
- sealing in the form of double ring on plunger stopper situated on the top of plunger
- smooth plunger sliding thanks to rubber sealing
- limitation flange securing against accidental removal of plunger
- special design of plunger stopper reduces the residual volume of medicine/liquid
- clear, legible and permanent black graduation facilitating dosage
- name of syringe and manufacturer's logo placed on barrel
- single-use
- non-pyrogenic, non-toxic
- packaging: 1 pc./paper-foil (blister)

indication

- 3-piece syringe for subcutaneous, intramuscular and intravenous infusions
- for insulin shots

SANViflon

I.V. cannula

features

- needle (stylet) made of stainless steel with back-cut blade
- cannula catheter made of Teflon (FEP), equipped with 4 radiopaque lines
- cannula equipped with wings and hand-closed cap of the upper port colour coded according to size
- handle that allows you to insert with one hand
- valve that prevents blood leakage to outside after inserting the cannula into the vessel
- flashback chamber secured with a Luer-Lock cap
- available in various sizes from 14 G to 26 G
- single-use
- packaging: 1 pc. – hard blister (PVC + lacquered paper) with a colour print in accordance with the colour identification of the size

indication

- for cannulation of intravenous, peripheral vessels to:
- multiple injections of intravenous drugs
 - intravenous infusion of solutions and parenteral nutrition suitable for peripheral veins
 - maintain the patient's hydration and / or reduce dehydration if the patient is unable to take sufficient fluid orally
 - blood transfusions and blood-like preparations
 - ensuring vascular access in the event of the need for rapid drug delivery, especially during diagnostic and therapeutic procedures

easyFLOW IS PREMIUM

infusion set

features

- 2-way, sharp spike of the drip chamber with anti-slip surface that guarantees tight and reliable connection with fluid containers
- air-vent with anti-bacterial filter and blue flap
- flexible droplet chamber, size 6 cm, equipped with additional pressure wings to facilitate insertion into containers with liquids
- dropper: 20 drops = 1 ml ± 0,1 ml
- liquid filter protecting against larger particles with pore size 15 µm
- precise safe roll clamp with integrated spike holder and with a holder for securing the drain
- name of the manufacturer placed on the roll clamp
- soft, flexible drain
- universal Luer-Lock tip secured by an Air Pass plug with a hydrophobic filter, which allows the drain to be filled without accidental contamination and prevents fluid leakage
- single-use
- non-pyrogenic, non-toxic
- individual packaging: paper-foil with a colored code (blue) identifying the device type

indication

- device for fluid transfer in infusion therapy

easyFLOW IS

infusion set (dual chamber)

features

- made of high quality materials, using the latest technology, which guarantees very high quality and trouble-free, intended use
- 2-way, 2-plane sharp closure-piercing device of the drip chamber with anti-slip surface that guarantees tight and reliable connection with fluid containers
- air-inlet with anti-bacterial filter and coloured (green) flap
- dropler chamber divided into a flexible lower part and a hard upper part with an additional pressure ring for easy insertion into fluid containers
- name of the manufacturer placed on the dropler chamber
- device in its entirety including the spike and tip transparent, allowing visual inspection of the flow along its entire length
- dropper: 20 drops = 1 ml ± 0,1 ml
- fluid filter protecting against larger particles with pore size 15 µm
- soft, flexible tubing with Luer-Lock conical fitting
- precise safe roll clamp with integrated spike holder and with a holder for securing the drain
- both tips of the device additionally secured with protective caps
- single-use
- non-pyrogenic, non-toxic
- individual packaging: paper-foil with a coloured code (blue) identifying the device type

indication

- device intended for connection to an intravenous line for the administration of fluids, photosensitive medicinal products solutions and other body fluids during infusion therapy

easyFLOW IS REG

infusion set with precision flow rate regulator

features

- 2-way, sharp closure-piercing device of the drip chamber with anti-slip surface that guarantees tight and reliable connection with fluid containers
- adjustable from 5 to 250 ml/h (dark blue digits on white background) for viscosities below 10% and adjustable from 5 to 200 ml/h (white digits on dark blue background) for viscosities 10%-40%
- ability to completely close (OFF) and open (ON) the flow rate
- air-inlet with anti-bacterial filter and coloured (blue) flap
- droplet chamber and drain made of phthalate-free PVC
- dropper: 20 drops = 1 ml ± 0,1 ml
- fluid filter protecting against larger particles with pore size 15 µm
- soft, flexible drain with additional port for drug application
- universal Luer-Lock tip secured by an Air Pass plug with a hydrophobic filter, which allows the drain to be filled without accidental contamination and prevents fluid leakage
- precise safe roll clamp with integrated spike holder and with a holder for securing the drain
- name of the manufacturer placed on the roll camp
- both tips of the device additionally secured with protective caps
- single-use
- non-pyrogenic, non-toxic
- individual packaging: paper-foil with a coloured code (blue) identifying the device type

indication

- device intended for connection to an intravenous line for the administration of fluids, photosensitive medicinal products solutions and other body fluids during infusion therapy with adjustable flow control

needle-free valve

features

- body made of transparent material - polycarbonate
- high-quality silicone membrane allows multiple port injections
- flat injection surface - smooth and evenly ended port membrane that facilitates disinfection
- metal-free, suitable for MRI examination
- male connector of the transparent port is secured with a cap allowing for aseptic removal of the item from the packaging*
- may be used for 7 days or up to 350 activations
- priming capacity: 0,09 ml
- high flow rate: 350 ml/min
- withstands injection fluid pressure of 3 bars (44 PSI)
- withstands back pressure of 2 bars (29 PSI)
- single-use
- packaging: 1 pc./paper-foil

indication

- intended for closing infusion ports
- device intended for multiple, needle-free injections (liquid drug administration, blood sample taking)
- protects infusion lines from contamination and infection during infusion therapy
- does not require using safety caps
- dedicated for standard Luer and Luer Lock connectors

REF	colour	intermediate packaging
PB-N	blue	100 pcs

needle free valve

with extension line

features

- housing made of transparent material - polycarbonate
- high-quality silicone membrane allows multiple port injections
- flat injection surface - smooth and evenly ended port membrane that facilitates disinfection
- extension line made of transparent polyurethane
- metal-free, suitable for MRI examination
- extension lines fitted with sliding clamps
- male connector protected with applicator
- total length 15 cm
- can be used for 7 days or 350 activations
- filling volume of needle-free port 0.09 ml
- dead space 0.001 ml
- resistance to injection fluid pressure 3 bar (44 PSI)
- resistance to back pressure 2 bar (29 PSI)
- single-use
- packaging: 1 pc. / paper-foil

indication

- device used to close infusion ports for multiple, needle-free injections and to protect the infusion line from contamination
- does not require using safety caps
- dedicated for standard Luer and Luer Lock connectors

3-way stopcock

features

- made of polycarbonate
- transparent housing
- clear optical identifier of open/close position (marked flow directions) operating in 360 degrees
- consistent, straight flow channels and an optimal internal diameter ensure correct pressure measurement
- rotating male Luer-Lock
- all inlets protected with caps
- resistant to lipids
- single-use
- non-pyrogenic, non-toxic
- packaging: 1 pc./paper-foil

indication

- device designed for managing the flow of infusion fluids during administration
- enables switching the infusion flow path
- for blood pressure monitoring
- for direct medicine/fluid supply

REF	colour	intermediate packaging

OXYGEN THERAPY

nasal oxygen cannula

features

- made of medical PVC
- very soft tips with smooth edges
- fastening under the chin with a soft, sliding adjustment ring
- various spacing of the nasal part of the cannula depending on the size
- universal connector compatible with any source of oxygen
- tubing with star cross-section that is resistant to bending
- available in 3 sizes: for adults, for children and for infants with 140 cm, 200 cm, 300 cm and 500 cm long tubing
- single-use
- packaging: 1 pc./foil

indication

- designed to deliver oxygen through the nose

🕒 60 min to 30 days

nebulizer

with T/F/M adaptor, mouthpiece,
corrugated tube and tubing

features

- made of non-toxic materials
- 210 cm long, bend-resistant tubing with star-shaped cross-section
- nebuliser with a 6ml capacity (graduated every 1ml), producing particles with an average size of MMAD = 3.91 µm at a flow rate of 6 l/min.
- nebuliser, tubing, T-adaptor, mouthpiece, one-way valve and corrugated tube included in a kit
- universal T-adaptor with a diameter of 22M/15F - 22F enables the kit to be connected to endotracheal, tracheostomy tube or breathing circuit and perform nebulisation on mechanically ventilated patients
- the universal (detachable) mouthpiece allows nebulisation to be given to patients who are breathing on their own
- silicone one-way valve (detachable) reduces medication waste during nebulisation
- single-use
- packaging: 1 pc./foil

indication

- device is designed to produce an aerosol containing fragmented medication, which can be delivered deep into the respiratory system with the patient's inhalation
- enables nebulisation to be carried out in mechanically ventilated patients by connecting directly to the endotracheal tube, tracheostomy tube or inspiratory arm of the ventilator breathing system
- allows you to perform nebulisation in patient „on one's own breath“

🕒 up to 60 min

endotracheal tube

cuffed

features

- made of flexible PVC
- equipped with lateral Murphy eye and radiopaque line over the entire tube length
- graduated every 1 cm, double depth marker to control the position of the tube
- low-pressure, high-volume cuff
- tube size marked in 4 places (on the connector, on the pilot balloon and in two places on the tube body)
- detachable connector with an outer diameter of 15 mm
- pilot balloon with LOT and size indication
- single-use
- packaging: 1 pc./paper-foil

indication

- for both oral and nasal intubation
- inserted into the trachea to prevent airway obstruction and respiratory failure

reinforced endotracheal tube

cuffed

features

- made of flexible PVC
- reinforcing within the wall of the entire tube
- equipped with lateral Murphy eye and radiopaque line over the entire tube length
- graduated every 1 cm, double depth marker to control the position of the tube
- tube size marked in 4 places (on the connector, on the pilot balloon and in two places on the tube body)
- indissociable connector with an outer diameter of 15 mm
- single-use
- packaging: 1 pc./paper-foil

indication

- for both oral and nasal intubation
- inserted into the trachea to prevent airway obstruction and respiratory failure
- for intubation of the patient in an unusual position, with a high risk of kinking the endotracheal tube

intubation stylet

features

- made of PVC-coated aluminium
- special material for both stiffness and pliability
- intended for use during difficult intubation
- size and diameter markings
- soft distal tip
- single-use
- packaging: 1 pc./paper-foil

indication

- allows you to give the endotracheal tube the right curvature
- introduced to the endotracheal tube facilitates intubation in routine and difficult cases, when the laryngeal inlet is not visible

tracheal tube introducer

curved

features

- made of medical grade low density polyethylene
- curved and rounded tip enables safe intubation without damaging the soft tissues
- optimum flexibility and rigidity facilitate correct insertion and safe removal of the introducer after intubation
- imprint of the size, diameter and manufacturer's name on the device
- bright yellow body for increased visibility of the introducer in the tracheal tube canal
- clear, easy to read graduation every 1 cm
- available in three sizes and lengths
- single-use
- PVC free
- packaging: 1 pc./paper-foil

indication

- for use during difficult intubation procedures
- as an aid to facilitate the insertion of the endotracheal tube during standard intubation

endotracheal tube holder

features

- made of high-quality materials
- universal Velcro fasteners enabling fast and effective fixing of the holder around the head
- adjustable handle allows for easy and fast fixation of every size of endotracheal tube
- special design of the bite-piece prevents patient trauma or damaging the tube (by biting)
- additional opening allows for chyme, saliva and blood suction from the oral cavity
- single-use
- packaging: 1 pc./paper-foil

indication

- to stabilize the position of the endotracheal tube after its insertion into the trachea

oropharyngeal airway/guedel airway

features

- made of high quality PE (polyethylene), free of PVC
- distinctive anatomical curve of airway tube allows for the opening of the upper respiratory tract and the free flow of anaesthetic gases, air
- colour coded sizes
- numeric marking of the size on the airway
- single-use
- packaging: 1 pc./foil

indication

- used during artificial ventilation procedures to ensure the airway patency
- as a tool for paramedic to assist in the management of a casualty's airway which increases the effectiveness of the rescue operation
- facilitates the stabilization of the endotracheal tube and protects it against biting

laryngeal mask

PVC

features

- made of medical PVC
- elastic mask body with description (size, cuff volume, suggested patient's weight)
- elliptic shape, flexible sealing cuff and universal, transparent connector: 15 mm
- colour-coded valve protection makes it easy to quickly recognize size
- single-use
- compatible with magnetic resonance (MR)
- no metal elements
- packaging: 1 pc./paper-foil

indication

- device inserted through the mouth, up to the back of the throat, forms a seal at the top of the glottis in order to:
 - direct protecting the patient's airway patency
 - artificial ventilation also during cardiopulmonary resuscitation
 - maintaining airway patency in: short-term surgical procedures, without the need of muscles relaxation, when endotracheal intubation is not necessary and under anesthesia for diagnostic procedures

tracheostomy tube

cuffed

features

- made of medical, flexible PVC
- swivel 15 mm connector
- flexible neckplates with slits for strap insertion to secure tube position
- soft, low-pressure, thin-walled cuff
- pilot balloon in contrasting colour clearly indicates the level of the cuff's inflation
- 2 fixation straps protected with foil
- clear size marking on the neckplates
- atraumatic, soft rounded tip, curved cannula
- radiopaque line
- equipped with obturator
- single-use
- packaging: 1 pc./rigid blister

indication

- to control respiratory tracts in people after tracheostomy
- introduced to the airways by a surgical incision of the trachea's front wall to allow ventilation
- provides free breathing bypassing the nose, throat and larynx

air cushion anaesthetic mask

features

- due to the high quality of materials used, ventilation is conducted in an atraumatic and safe way for the patient
- anatomically shaped inflatable cuff, ensures perfect tightness of the mask with minimal pressure
- device, when applied to the face, tightly covers the patient's mouth and nose without compressing the eyes
- clear shell provides continuous visual observation of the patient
- colour-coded retaining rings, easy for size recognition
- retaining ring can be removed when it is not needed
- full size range allows to properly choose the size of the mask depending on the age of the patient
- all sizes are equipped with inflatable check valve to adjust air amount for best cushion fitting auto patient's face
- single-use
- packaging: 1 pc./foil

indication

- intended for the administration of a gas mixture coming through devices for artificial ventilation
- enables performing medical procedures including artificial ventilation, administration of anesthetic gas and carrying out emergency treatment of an unconscious patient

🕒 30 - 60 min

anaesthetic mask with open seal

features

- due to the high quality of materials used, ventilation is conducted in an atraumatic and safe way for the patient
- anatomically shaped open seal made of TPE ensures perfect tightness of the mask with minimal pressure
- polypropylene, transparent mask dome allows continuous visual observation of the patient
- device, when applied to the face, tightly covers the patient's mouth and nose without compressing the eyes
- size embossed on the body and colour-coded seal
- full size range allows to properly choose the size of the mask depending on the age of the patient
- single-use
- packaging: 1 pc./medical foil

indication

- device intended for the administration of a gas mixture coming through devices for artificial ventilation
- enables performing medical procedures including artificial ventilation, administration of anesthetic gas and carrying out emergency treatment of an unconscious patient
- device used in hospitals (operating theaters, intensive care units, emergency departments) as well as during pre-hospital care by rescue teams carrying out rescue operations in an unconscious patient

catheter mount with double swivel elbow connector

features

- smooth bore type made of medical PVC
- expandable type made of high quality PE, EVA
- universal patient connection: 22M/15F
- ventilation device side connector: 15M or 22F
- expandable version characterized by shape memorizing and by the ability to control the position of the connector
- double swivel elbow connector
- port for suctioning and bronchoscope secured with a stopper
- available in versions: smooth bore and expandable
- single-use
- packaging: 1 pc./paper-foil

indication

- used to connect the tracheostomy tube or endotracheal tube with the breathing circuit of the ventilation device
- provides greater mobility and rotation of the connection, increasing patient comfort and safety

🕒 60 min to 30 days

dual-limb breathing circuit

features

- made of high quality EVA material, without PVC
- 15F/22M and 22F universal connector fits compatible products and devices for mechanical ventilation or anesthesia machine
- expandable arms with maximum length of 160 cm
- adjustable length of circuit enabling adjustment of length of respiratory system and optimization of dead space
- equipped with latex-free breathing bag: 2l and 3l (for adults) or 1l (for children)
- additional expandable tube, length: 100 cm
- elbow with Luer-Lock port
- single-use
- packaging: 1 pc./foil

indication

- for patient's mechanical ventilation
- it enables transporting breathing mixture from equipment (ventilator, anesthesia machine) to respiratory protection device (e.g. tracheal tube, tracheostomy mask) and vice versa

SUCTION CATHETERS, STOMACH TUBES

suction catheter with vacuum control

features

- made of soft and flexible PVC, that is resistant to bending and kinking
- frozen surface prevents the catheter from sticking to the wall of the endotracheal tube
- full control over the suction
- atraumatic, soft rounded, open tip
- tip with two alternating side holes with smooth edges
- colour-coded connectors for size recognition, numerical size identification on the packaging
- single-use
- packaging: 1 pc./paper-foil

indication

- device designed for suction of secretions from the upper respiratory tract

feeding tube graduated, with X-ray contrast

features

- made of soft PVC with a frosted surface, resistant to bending and kinking due to the appropriate degree of hardness
- atraumatic, soft rounded, closed tip facilitates precise insertion of catheter
- two alternate end side holes with gently stretched edges
- connector compatible with the conical tip of Luer syringe
- integrated stoper allows the tube to be closed tightly
- colour-coded connectors for size recognition, numerical size identification on packaging
- radiopaque line along the entire length of the catheter
- digital depth graduation every 1 cm (from 5 cm to 40 cm)
- length 50 cm
- name of the manufacturer placed on the catheter
- individually packed straight
- single-use
- packaging: 1 pc. / paper-foil

indication

- device inserted through patient's nose or mouth to perform enteral nutrition

stomach tube/duodenal tube

features

- made of PVC
- made of material that is resistant to bending and kinking due to the appropriate degree of hardness
- atraumatic, soft rounded closed tip
- four side holes with smooth edges
- colour-coded connectors for size recognition, numerical size identification on packaging
- stomach tube is available in 3 lengths: 80 cm, 100 cm, 125 cm and duodenal tube is available in 150 cm length
- single-use
- packaging: 1 pc./paper-foil

indication

- inserted through nose or mouth into stomach or duodenum
- drainage of stomach/intestinal content
- decompression of stomach (air or food evacuation)
- gastric lavage
- taking samples of stomach content
- control of bleeding from the upper section of digestive tract
- evaluation of secretory function
- administration of medicines, fluids and/or food content into stomach or duodenum

Foley catheter

2-way, silicone-coated latex

features

- made of soft and flexible latex, that is resistant to bending and kinking
- atraumatic, soft rounded, special tip facilitating insertion of the catheter to the bladder
- tip with two lateral eyes with smooth edges
- universal urine drainage port of the catheter fits into standard connectors in urine bags
- silicone-coated surface that allows atraumatic insertion of the catheter
- easy to fill and to empty, tear-resistant balloon of various capacities
- plastic or rubber valve to ensure balloon tightness
- CH 6, CH 8, CH 10 size has a guide to facilitate catheterization
- single-use
- packaging: 1 pc./double packaging: internal- foil, external- paper-foil

indication

- to drain urine from the bladder

with plastic valve

Foley catheter

2-way, 100% silicone

features

- made of soft and flexible silicone, that reduces the allergic reaction of the mucous membranes and increases the patient's comfort
- atraumatic, soft rounded, special tip facilitating insertion of the catheter to the bladder
- tip with two lateral eyes with smooth edges
- universal urine drainage port of the catheter fits into standard connectors in urine bags
- radiopaque line along the entire length of the catheter
- easy to fill and to empty, tear-resistant balloon of various capacities
- plastic valve to ensure balloon tightness
- CH 6, CH 8, CH 10 size has a nylon guide to facilitate catheterization
- available in version with 10 ml sterile water pre-filled syringe with 10% glycerin to seal the balloon
- separately packed Catheter Spigot inside the packaging
- single-use
- packaging: 1 pc./double packaging: internal- foil, external- paper-foil

indication

- to drain urine from the bladder
- recommended for patients with blood clots or sediment in their urine

urine bag

with sample port 2W

features

- latex-free 2000 ml bag made of medical grade PVC
- white back wall making urine easy to notice
- effective non-return valve
- tight T-valve, that can be easily operated with one hand and which can be folded and tucked in a hard sheath
- Pasteur type droplet chamber providing a „dry“ air barrier
- two hydrophobic air filters (in a bag and chamber), which prevent sucking, balancing the pressure inside the system
- 120 cm long, large diameter tubing, ensuring a free and effective urinary outflow with a universal stepped connector
- self-tightening port for sample taking at the end of tubing
- tubing equipped with a sliding clamp and a fastening pin to stabilize the tubing
- at the place where the tubing connects to the chamber, an additional reinforcing element prevents bending and kinking the tubing
- precise, easy-to-read scale, adequate for diuresis measurement, with high measurement accuracy, every 25 ml from 25 ml to 100 ml and every 100 ml from 100 ml to 2000 ml
- tag to describe the patient's details and date
- integrated universal hanger system matching the round and square bed rails
- additional fixing with a string
- single-use
- packaging: 1 pc./paper-foil

indication

- device is intended for 14-days urine collection in a closed system

REF	capacity	length of tubing

urine bag with absorbent, non-sterile

features

- made of medical-grade materials (PVC, ABS)
- pouch with a gelling medium (superabsorbent polymer) in the bag allows the liquid to change its physical state into a solid, providing for safe utilisation of the product after use
- specially shaped funnel-type connector to create a tight connection with the „T” type drain valve of the urine collection bag
- 2 cm long tube made of material that prevents kinking and twisting, ensuring free and efficient urine drainage, with a sliding clamp to close the tube after the bag is full
- strong cord, which is part of the absorbent collection bag, threaded through the drain valve of the „T” type of urine collection bag allows the connection of two bags to be secured
- easy-to read, precise double scale from 100 ml, scaling in 100 ml increments
- non-toxic
- single-use

indication

- for the disposable transfer of urine from a urine collection bag.

Yankauer surgical suction cannula

standard CH21

features

- completely transparent for full possibility of observing the sucked secretion
- light and perfectly balanced handle ensures high comfort of work and reduces hand fatigue
- perfectly smooth inner surface prevents blocking or retaining the sucked content, ensuring correct and optimal flow
- cannula with double bend of curvature
- four lateral eyes, which prevent the tip from sticking to the tissues and one central opening
- universal stepped connector ensures tight connection with a wide range of suction connecting tubes
- single-use
- packaging: 1 pc./double packaging: internal- foil, external- paper-foil

indication

- evacuating secretions and body fluids from the operating field in general surgery

REF	features	intermediate packaging
KO-00204	without suction control	50 pcs
KO-00214	with suction control	50 pcs

surgical suction tube

features

- made of soft and flexible PVC
- along the tube a special longitudinal reinforcement to prevent bending and sucking of the tube
- perfectly smooth inner surface of tube prevents the sucked content from settling on the walls, ensuring correct and optimal flow
- connector type funnel-funnel cut-to-fit with the possibility of cutting in the marked places of the connector and matching to any type of medical suction device (for the diameter of 8 mm to 18 mm)
- funnel connector equipped with a special bending system, enabling convenient manipulation of the tube
- tube connectors compatible with the standard suction cannulas, enabling their reliable, effective and tight connection
- single-use
- packaging: 1 pc./double packaging: internal- foil, external- paper-foil

indication

- device designed for connecting the suction cannula to medical suction device
- Kapkon connector – designed to connect the catheter for aspiration of upper respiratory tract to medical suction device

SC-002	special	100 pcs

bulk packaging:
10 x 100 pcs

umbilical cord clamp

features

- made of polypropylene
- safe clamping teeth with rounded edges do not cut the umbilical cord
- serrated clamping surface of the arms stabilize the clamp on the umbilical cord, after closing it is not possible to open the clamp again
- double Lock catch prevents accidental opening
- universal size
- single-use
- non-pyrogenic
- packaging: 1 pc./paper-foil (blister)

indication

- device is designed for clamping the umbilical cord of a newborn in a labour ward in order to close the lumen of the umbilical blood vessels after cutting it off of the placenta

OTHER PRODUCTS

ID wristband

features

- durable wristband coating characterized by high humidity resistance and resistance to the activity of soaps, hand disinfectants and other liquids used in hospitals
- made of soft and delicate vinyl
- flexible, delicate, very light and easy to put on
- rounded edges prevent from injuring
- high tensile strength
- colour marking depending on the purpose
- single-use fastening resistant to accidental break
- hypoallergenic, latex-free, phthalate-free
- packaging: 100 pcs/box

indication

- for identification of patients in hospital wards

entrance mat

features

- blue mat consisting of 30 layers - thin sticky sheets
- each of the sticky sheets made of polyethylene resin
- does not contain heavy metals
- excellent adhesive properties
- the first and last sheets secured with a non-adhesive foil
- low mat profile: app. 2 mm thick
- the bottom surface adheres very well to the floor over the entire surface, preventing adverse movement of the mat, allowing trouble-free passage of trolleys with equipment or beds, without the risk of curling up the mat or tearing
- no need to clean the mat - as soon as the surface of the mat is contaminated, it should be torn off to uncover a new, clean sheet
- there is numbering of sheets on a white non-adhesive material in the mat corner facilitate quick identification and easy removal of subsequent sheets
- light, easy to spread

indication

- preventing spreading of contamination brought on shoe soles and wheelchairs to operating rooms

enema bag

features

- bag with a capacity of 1750 ml with two holes for hanging
- made of medical PVC
- scaled from 50 ml to 1750 ml
- linear scale every 100 ml, digital scale every 200 ml
- tube with a length of 150 cm with a sliding clamp, ended with an atraumatic opening and one lateral opening
- tube end is secured with a tube cap
- upper part of the bag is reinforced with an additional flange stabilizing the inlet during filling with liquid
- flange is equipped with a non-return valve
- single-use
- packaging: 1 pc./foil

indication

- bag that allows introduction of fluid into the large bowel through the anus to remove fecal material and stimulate peristaltic bowel movement

REF
WLS

bulk packaging:
150 x 1 pc.

enema bag

features

- bag with a capacity of 1500 ml with a hole for hanging
- made of medical PVC
- digitally scaled every 250 ml
- tube with a length of 115 cm with a sliding clamp, ended with an atraumatic opening and one lateral opening
- greased end of the tube secured with a cap
- single-use

indication

- bag that allows introduction of fluid into the large bowel through the anus to remove fecal material and stimulate peristaltic bowel movement

vomit bag

features

- bag is made of durable, transparent blue foil, enabling the observation of secretions
- total bag capacity: 2000 ml
- exact measuring graduation (from 10 ml to 100 ml every 10 ml and from 100 to 2000 ml every 100 ml) placed on the bag allows accurate estimation of fluid volume
- direction of graduation reading for small volumes is marked with the tip
- wide bag inlet protected by a plastic collar
- circle-shaped collar ensures a firm grip, makes it easier to maneuver the bag, reducing the risk of content contamination
- collar equipped with a special incision to close the bag and hygienic disposal of the vomit - „twist and hook”
- device name, manufacturer's name and pictorial instructions for use printed directly on the bag
- single-use
- class I non-sterile medical device
- packaging: 20 pcs/foil bag

indication

- recommended in uncomfortable situations, in cases of gastroesophageal reflux requiring immediate action
- used in hospitals, outpatient departments, ambulances, etc.

tactical tourniquet CAT

features

- made of soft and breathable material to prevent chafing and skin burns
- additional element to secure the tourniquet and control blood flow
- locking system to prevent accidental opening of the tourniquet
- one-handed mechanism
- durable loop system with internal, free-moving strap that provides circumferential compression to the limb
- the unique double fastening system allows to avoid the use of screws and clips
- high quality of workmanship
- place to write down the time of establishment
- weight: 82g
- folded dimensions: 16 cm x 6 cm x 4cm
- unfolded dimensions: 96 cm x 4 cm
- individually wrapped in foil packaging
- single-use

indication

- tactical tourniquet used in case of limb injuries with massive arterial or venous bleeding that cannot be controlled by traditional techniques

REF	dimensions	intermediate packaging
ST-001	96 cm x 4 cm	1 pc.

 bulk packaging:
100 x 1 pcs

automatic tourniquet

features

- components: blue stretchy strap and white ABS plastic buckle
- length 480 mm +/- 5 mm, width 25 mm +/- 1 mm
- wide, stretchable band put above the venipuncture site reduces the pressure intensity
- protects against the congestion of the arm, minimizes unpleasant sensations, improves the quality of the blood sample
- reusable
- packaging: 1 pc./double packaging: internal- foil, external- box

indication

- used to induce venous stasis and to make a vein selected for puncture more prominent

REF	intermediate packaging
SA-001	21 pcs

 bulk packaging:
20 x 21 pcs

for children

features

- components: polyester stretch strap and ABS plastic items
- length 450 mm +/- 5 mm, width 25 mm +/- 1 mm
- wide stretch strap to minimise pressure build-up during compression
- significantly protects against arm congestion, improves the quality of the blood sample for examination
- reduces unpleasant sensations during compression
- a simple one-handed mechanism for easy fastening and unfastening with gradual release of pressure
- reusable

indication

- device used to induce venous stasis and to make a vein selected for puncture more prominent

REF	intermediate packaging	color
SA-002	21 pcs	yellow + imprint

 bulk packaging:
20 x 21 pcs

latex-free tourniquet

features

- made of a wide stretch TPE strap (thermoplastic elastomer)
- latex-free material prevents allergic reactions and skin irritation
- high tensile strength
- single-use bands reduce the risk of infection
- total roller length 11,25 m
- single-use
- individual packaging contains: 25 tourniquets
- packaging: 1 roll/paper dispenser that allows convenient sharing of perforated tourniquets

indication

- used to induce venous stasis and to make a vein selected for puncture more prominent

safeLANCE

pressure-activated safety lancet

features

- easy to use, minimizes unpleasant feelings
- special construction allows lancet tip to be automatically inserted into finger pad and then to be retracted so that needle is not visible before or after puncturing
- correctly matched size of lancet allows you to get optimal amount of blood with minimal patient's pain
- design ensures safety for medical personnel and patient by eliminating accidental puncture and infection
- perfect guidance of lancet needle inside housing reduces vibration, thus decreases patient's pain and prevents damage to skin tissue
- available in two sizes:
 - 23 G, puncture depth 1,8 mm - green, dedicated for women and children
 - 21 G, puncture depth 2,4 mm - pink, dedicated for men
- single-use
- packaging: 100 pcs/box

indication

- capillary blood sampling from fingertip or ear flap for testing, for example, glucose level

GAUZE LAP SPONGES

features

- 100% hydrophilic cotton gauze
- bleached with the use of hydrogen peroxide
- with a sewed in X-ray detectable thread or chip, which enables fast and non-invasive identification of the lap sponge left in the operating field
- with a belt to fix the lap sponge beyond the operating field

indication

- as a surgical invasive dressing material for intraoperative absorption of large amounts of blood and body fluids from surgical wounds

Before used on open wounds, the device must be sterilized in accordance with a validated sterilization method. It can be sterilized with steam or ethylene oxide.

available on request

HOW TO CHOOSE A DRESSING PROPERLY?

When choosing the proper type of dressing, pay special attention to:

- absorption rate and absorption capacity,
- vapor permeability,
- possibility of an atraumatic dressing change,
- safety of use.

non-woven eye dressing with absorbent pad

elastopor EYE

indication

- covering an eye and its area after ophthalmic procedures and surgical procedures
- sight correction in strabismus therapy

Conforms well to facial contours thanks to the oval shape.

elastic tubular net bandage elastoNET

features

- elastic net bandage in the form of a tube
- contains polyamide and elastomer
- high stretchability and strength of returning to pre-stretch state
- elastic and very soft
- easy and quick to use
- length before stretching:
 - 1 m, stretched: 2,5 m
 - 10 m, stretched: 25 m

indication

- fixation of all dressings on the patient's body, replacing the traditional bandage
- the use of tubular net bandage reduces the time of wound dressing and makes it easier to fix the dressing to the patient's body

How to make a HIPOCRATES CAP?

FIRST AID FOR DRESSING WOUNDS USING BANDAGES

Hippocrates' achievements in treating head wounds were so widespread and advanced that they are still used today. The Hippocrates cap also called "mitrais" a headgear that allows you to hold the dressing and stop bleeding of the head wound. It is made of two bandage tapes. The main purpose of using the Hippocrates cap is to hold the dressing directly protecting the bleeding head wound, seal and warm the head, hold the compress applied to the skull area, compression, strengthening and immobilization after surgery and additional protection against the external environment. This solution is used in the absence of access to dressings such as elastic dressings and scarves.

RULES FOR BANDAGING

1. Prepare a two-head bandage about 5-6 cm wide by sewing together two bands or by twisting the free end to the middle.
2. Put the two-headed bandage on the back of the head and drive bandage to the forehead a circular move.
3. Cross the bandages on the forehead and drive one through the top of the head towards the occiput by a longitudinal move.
4. Drive the other bandage above the ear to the occiput also (half-round).
5. Scroll the longitudinal course through the circular course bandage.
6. Drive back the longitudinal course bandage across the top of the head to the forehead.
7. Drive the circular course bandage around the other ear to the forehead
8. Continue longitudinal and circular moves, the circular course bandage wraps around the scalp
9. Little by little, move the longitudinal course bandage towards the temples
10. After covering the whole area with a two-head bandage, fix the ends of bandage

IMMOBILIZING DRESSINGS

ORTHOPEDIC PADDINGS

features

- very soft and fluffy
- adhere well and adjusts to the shape of the body
- coherent structure resistant to stratification makes it easier placement of the immobilizing dressing
- minimize the risk of skin abrasions and irritations under the P.O.P. bandage
- do not absorb moisture and thus do not allow for its contact with the skin
- hypoallergenic

indication

- as a protective layer put under plaster of Paris bandages
- in compression therapy as a padding under the bandages of various elasticity

triangular sling

elastoSLING

white
colour

features

- triangle shaped sling made of non-woven or cotton
- thin, light and elastic - comfortable for the patient, adjusts to the shape of the body, provides freedom of movement
- possibility of connecting several slings to achieve bigger immobilization
- hypoallergenic

indication

- short-term immobilization and support of the upper limb in case of various injuries e.g. dislocation or fracture of collar bone, humerus, forearm or hand bone

REF	dimensions	description	packaging unit zipper pouch	intermediate packaging foil bag
CHTW9696136	96 cm x 96 cm x 136 cm	non-woven	1 pc.	12 x 1 pc.
CHTB9696130	96 cm x 96 cm x 130 cm	cotton	1 pc.	12 x 1 pc.

bulk packaging:
20 x 12 pcs

HOW TO PROPERLY PUT ON A TRIANGULAR SLING?

1. Place the triangular sling on the patient's body so that one of the corners of the sling is at the level of the elbow of the immobilized hand.
2. Place the second corner of the sling on the opposite arm in relation to the immobilized hand.
3. Carefully place the sick / injured limb on the sling.
4. Wrap the sick/injured limb with dangling, third corner of the sling.
5. Make sure that the hand is in the right position, and then tie the corners of the sling around the neck.

P.O.P. BANDAGES

features

- made of cotton gauze coated with natural plaster of Paris on both sides
- on a plastic roll
- enable fast and durable immobilization
- before fixing need to be soaked in a container with water at 20°C temperature
- do not absorb X-rays

indication

- large and small immobilizing dressings in orthopedic, ambulatory and surgical procedures

RULES FOR BANDAGING

1.

Select a bandage of proper type and size for the part of the body to be bandaged.

2.

With your right hand, grasp the beginning of the band, and with your left hand hold the rolled part so called "head".

3.

Put the patient in a comfortable position supporting the bandaged lower or upper limb.

4.

For proper stabilization of dressing, start bandaging with a circular wrap, each subsequent layer covers exactly the previous one in a durable and aesthetic way. Little by little unroll the band during bandaging. Finish the bandaging with a circular wrap, end of the dressing secure with a clip or tie it.

5.

The bandage should adhere correctly to the patient's body and be rolled up with adequate power - too much pressure can lead to impaired circulation, too loose it will slide and fall.

6.

Remove the bandage by transferring it from one hand to other to minimize patient movement.

SPECIALIST DRESSINGS

paraffin gauze dressing paraffiNET

features

- wide-mesh dressing made of cotton gauze covered with paraffin
- structure of the carrier material allows exudate to be freely drained to the covering secondary dressing
- covering with a layer of paraffin reduces risk of adhesion to the wound and allows a painless change of dressing
- neutral properties of paraffin allow for using the dressing in combination with other preparations containing medicinal substances or antiseptics
- can be shaped and cut according to the needs aseptically
- needs to be covered with a dressing with absorbent properties, e.g. compress, high-absorption dressing, polyurethane foam
- non-adhesive, necessary fixing with a tape, bandage or net tubular dressing
- hypoallergenic

indication

- keeping proper moisture in the wound
- preventing the wound edges from drying and maceration
- recommended for uninfected wounds
- treatment of chronic wounds: various ulcers, bedsores
- treatment of surgical and burn wounds, skin donor and grafting sites, skin damage, cuts
- protection against radiation skin damage

surgical kits

The company's offer also includes small surgical kits under the deltaset brand. They are used in treatment rooms, emergencies, hospital wards or dialysis units. They contain all disposable products necessary to perform the procedure in aseptic manner.

Deltaset packages are dedicated to a specific procedure, e.g. for changing a dressing, catheterization, dialysis or anaesthesia. The kit includes: disposable equipment, dressings, surgical drapes, surgical instruments, accessories, medical gloves and many more.

be well

NEW

innovative home post-operative wound care kit

beWell is an innovative home post-operative wound care kit designed with maximum patient comfort and safety in mind. It consists of sterile disposable items and equipment that allow for three changes of dressings for sutured and uninfected post-operative wounds.

What distinguishes the beWell kits?

elastoDERM F foil dressings with „frame” type application system ensuring complete waterproofing, allowing patients to bathe freely without the risk of wetting the wound.

Elastopor STERILnon-woven dressings, tailored to the wound size. A special smooth layer of the absorbent pad prevents the dressing from sticking to the wound surface or stitches, ensuring a safe and painless dressing change.

medical waste, which facilitate the safe disposal of used materials after dressing changes.

Each kit contains three complete sterile deltaset packages for changing dressings.

< 5 cm
small wounds

BW-ZWM-ZOP01SN

< 10 cm
medium wounds

BW-ZWM-ZOP02MN

> 10 cm
large wounds

BW-ZWM-ZOP03LN

The kit includes:

- 3 sterile deltaset dressing change packages, including:
 - a surgical drape with a cellulose layer (38 x 45 cm)
 - plastic tweezers (125 cm)
 - non-latex, powder-free diagnostic gloves
 - gauze pads adjusted to the wound size
- 3 sterile elastopor STERIL dressings with absorbent inserts
- 3 sterile elastoDERM F foil dressings with „frame”
- 3 bags for medical waste,

The deltaset package marked (2) additionally contains:

- sharp-tipped metal surgical scissors
- metal anatomical tweezers

 omegapack

surgical sets

Surgical sets are medical devices personalized according to customer needs, dedicated to a selected medical procedure.

components of the Set

Operating theatre is a specific environment where time is the most valuable factor influencing the success of the operation. It is a place where every minute - or even a second - counts, because it can affect the patient's life. To meet the expectations of medicine, ZARYS introduces operating sets to its offer that meet the highest standards, helping to improve the preparation of the operating theatre before the procedure

advantages of using surgical sets

QUALITY

properly selected composition of the set according to individual needs for a specific medical procedure in line with the Customer's order

EPIDEMIOLOGICAL SAFETY

reduced risk of patient infection by minimizing the time of contact of medical staff with devices during the preparation of the theatre and the patient

STANDARDIZATION OF PROCEDURES

correct and schematic conduct during the procedure
one package - one treatment

EASY RECORD KEEPING

optimization of record keeping - one self-adhesive label with the identification of the used set, instead of each used product separately

REDUCTION OF ERRORS

the complete set contains all disposable medical devices necessary for the surgical operation, which eliminates the possibility of errors during the selection of individual products

WIDE RANGE OF PRODUCTS

a wide range of medical devices selected individually in accordance with the Customer's preferences

SAVING THE STOCKS

reduced number of supplies, saving space in the warehouse

TIME

unpacking the set and preparing the operating theatre takes about

30%

less time than selecting individual products and improving work at operating block

REDUCING COST

EFFECTIVENESS

increasing work productivity, so that you can perform more surgical procedures in one day, improvement of work of medical staff

ENVIRONMENT

the amount of generated waste is reduced to a minimum

- one packaging

complete your set own

STEP 1: specialized drape as a key component of each surgical set

STEP 2: other components necessary for a given procedure, such as: dressing materials, disposable equipment, surgical gowns, disposable tools, containers and others

Medical devices under the omegapack brand by ZARYS are operating sets containing complete equipment with all disposable products necessary to perform a given medical procedure to which the set is dedicated. The operating set contains carefully selected disposable components, such as:

- surgical drapes, pads
- accessories, e.g. fluid collection bags, tapes
- surgical gowns
- surgical gloves
- covers for equipment
- shoe covers, masks, caps
- gauze balls
- gauze and non-woven swabs
- bandages, dressings
- catheters, urine collection bags
- trays, bowls
- taps, three-way stopcocks
- manifolds, connectors
- infusion sets
- suction sets
- disposable surgical instruments
- injection needles and syringes
- disposable electrostimulation electrodes and accessories and many more.

personal protective
equipment

PROTECTIVE COVERALL SAFE+ AGAINST CHEMICAL AND INFECTIVE AGENTS TYPE 4b - 5b - 6b

Personal protective equipments (PPE) are products that protect against one or more risks to the user's health or safety. These products must comply with Regulation (EU) 2016/425 of the European Parliament and of the Council. PPE is classified into three categories according to the degree of risk.

The coverall is a PPE category III in accordance with the Regulation (EU) 2016/425 of the European Parliament and of the Council

The category III covers products of complex construction, intended to protect health or life against risks that may cause death or irreversible damage to health.

Standards:

Coverall is personal protective equipment of category III in conformity with Regulation (EU) 2016/425 of the European Parliament and of the Council

| surgical sets | surgical gowns

surgical drapes and gowns

Surgical drapes are used to ensure microbiological cleanliness of the working area during surgery and to reduce the risk of bacterial flora migration from the patient's skin to the wound. They are also used to control the spread of bodily fluids.

Surgical gowns are an essential protective barrier. They prevent the transmission of infectious agents from the medical staff to the patient. They reduce the risk of spreading desquamated skin particles in the air in the operating room.

The ALPHAtex brand and its wide range of solutions are the result of over thirty years of ZARYS's presence in the medical market.

Sharing our experience and knowledge, we are confident that the use of ALPHAtex products ensures comfort, safety, and economic efficiency in daily work in operating theaters.

individual **omegapack** and **deltaset** kits

The operating room is the heart of every hospital, where hundreds or even thousands of surgical procedures are performed, during which the skin is opened and incised. This can lead to infections or contamination of the surgical site, which is why maintaining the highest level of safety in operating rooms is crucial.

ZARYS International Group
sp. z o.o. sp.k.
ul. Pod Borem 18
41-808 Zabrze, Poland
www.zarys.pl

We use two types of individual packaging: paper-foil type and durable Header Bag with a TYVEC insert that allows sterilization processes. All contain a label with the product name, its graphic representation, and informative pictograms. Additionally, they are equipped with self-adhesive TAG labels for data archiving and information on the opening direction.

double packaging system

 ALPHAtex

ALPHAtex product packaging is made according to the highest quality standards. The solutions used allow the user to easily open and safely remove the sterile product needed for the procedure.

Our medical product packaging is designed with safety, hygiene, and contamination protection in mind.

For ALPHAtex surgical drapes, ZARYS International Group uses a double packaging system involving the use of foil bags or smaller cardboard boxes and additional external protection in the form of a corrugated cardboard carton. This is to maintain the sterility of products delivered to the operating theater at every stage of transport.

product lines: surgical field drape system

STANDARD S

- Procedures with standard or slightly increased fluid levels
- 2-layer material
- Barrier against microorganism penetration
- Absorbent and waterproof material over the entire surface
- Tensile and puncture strength
- Paper-foil packaging
- 4 self-adhesive TAG labels

STANDARD+ S+

- Procedures with high fluid levels
- 2-layer material with reinforcement
- Barrier against microorganism penetration
- Absorbent and waterproof material over the entire surface
- Additional highly absorbent reinforcement in the critical zone
- Increased tensile and puncture strength
- Paper-foil packaging
- 4 self-adhesive TAG labels

COMFORT C

- Procedures with very high fluid levels
- 3-layer material with reinforcement
- Barrier against microorganism penetration
- Absorbent and waterproof material over the entire surface
- Additional highly absorbent reinforcement in the critical zone
- Increased tensile and puncture strength
- Flexible material adapting to body shape
- Paper-foil packaging
- 4 self-adhesive TAG labels
